

**Perfect Solution for providing WATER CIRCULATION
and AERATION through a Single Device**

EVEREST FLONERGIA

AIRLIFT PUMPS

- 50-70% Less Energy Usage compared to systems using Centrifugal Pumps
- Improved Water Aeration with the ability to operate using other injection gases if needed
- High ability to handle solid water mixtures
- Minimal Maintenance Requirements- **No moving Parts**
- Reduced Noise Levels
- Widely used in Aquaculture, Hydroponics, Aquaponics & WasteWater Treatment
